

Where have we worked?

Neos Learning is a truly global organisation in terms of its reach. Since we formed in 2001, we have worked in the USA and Canada, Africa, the Middle east, the Far East and across Europe. Thus, we have a great understanding of international business and the cultures associated with those various domains. The countries represented on this PDF demonstrate where we have both designed and delivered effective interventions over the past 12 years of operating.
